

Daniel Tan

Cybersecurity Student | daniel.tan@example.com | +60 12-345 6789

Professional Summary

Cybersecurity undergraduate with hands-on practice in web application security testing, penetration testing labs, vulnerability assessment, and security report writing. Familiar with Kali Linux, Burp Suite, OWASP Top 10, SQL injection testing, and basic Python scripting.

Technical Skills

Python, Kali Linux, Burp Suite, OWASP ZAP, Nmap, Wireshark, SQL Injection, XSS, OWASP Top 10, Web Security, Vulnerability Assessment, Report Writing, HTTP, Linux

Experience

Security Lab Assistant - University Cybersecurity Club

- Performed basic vulnerability assessment on intentionally vulnerable web applications.
- Used Burp Suite to inspect HTTP requests and test authentication and access control issues.
- Prepared short security reports with evidence, impact, and recommended mitigation.

Projects

Web Application Pentest Practice

- Tested DVWA and Juice Shop for SQL injection, XSS, broken authentication, and access control issues.
- Created a simple Python script to organize findings and generate report notes.

Mobile Security Learning

- Used MobSF to perform static analysis on sample Android APK files and summarized insecure logging and hardcoded string findings.

Education

Bachelor of Computer Science (Cyber Security), Asia Pacific University - Year 2
